

SHREDDER UK ALPHA STRIP CUT

Overview

Protect your confidential and valuable information from being stolen by shredding any documents that may put your personal information at risk from identity fraud. The Rexel Alpha shredder is designed to shred personal and home office business documents and has a S1 security level which means that it shreds everyday documents into strip cut particles (sized 7.2mm) making it ideal for regular shredding. By destroying hard copy documents that contain your private information such as household bills, statements and receipts you can protect yourself from the fastest growing fraud in Europe.

The compact and stylish Alpha shredder can shred up to 5 sheets of 80gsm paper in a continuous feed as well as CD's, credit cards, paperclips and staples due to the high performance steel cutters. It features a 10 litre large capacity easy to open waste bin that holds up to 30 sheets of shredded paper. The overheat protection function means that the thermostat detects when the shredder overheats and automatically goes into cooling down mode for additional safety. It also features auto start, stop and reverse functions for ease of use. The Alpha is a quiet shredder (less than 68DBA) making the ideal choice for the home or home office.

Weighing just 2.136kg and sized at 317(H) x 152(W) x 294(D) mm, the Alpha shredder also offers the extra peace of mind of a 2 year warranty, an extended warranty on the cutters plus it is compliant with finger safe international standards.
